Designer and builder working across financial products, design systems, and AI workflows.

Head of UX

PIMCO ($2T Asset Manager) | 2019 - Present

Led Design, Research, and Front-End Engineering across advisor and institutional platforms. Scaled headcount from 1 to 10. Empowered the team to build tools, shared systems, and AI-assisted workflows that strengthen design as a capability across the firm.

Business Wins

- Generated $300M in annual AUM by scaling a risk and analytics platform
- Built Email Studio, cutting average email delivery from 5 days to 2 and increasing send velocity in our primary marketing channel
- Cut annual PIMCO.com operating costs from $1M to $500K by bringing component design and development fully in-house

Head of Design

AIG (Fortune 100 Insurance) | 2015 - 2019

Led a centralized design organization supporting core business units and M&A initiatives. Developed research plans, product roadmaps, and testable prototypes across annuities, life insurance, and travel insurance.

Business Wins

- Increased annuities platform NPS from 0 to 53 by integrating agent feedback
- Raised B2C travel insurance conversions 25% through a redesigned funnel
- Cut development time 2x by launching an enterprise design system
